

RAHUL KRISHNAN

DevOps Engineer

Bangalore, India | rahulkrishnan.beechithil@gmail.com | +91 9544364192 | www.linkedin.com/in/rahul-krishnan-s17

PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of experience building and operating CI/CD pipelines, GitOps workflows, and Kubernetes-based deployments across AWS, Azure, and GCP — including both cloud and on-premises environments. Skilled in Infrastructure as Code (Terraform), container orchestration (EKS, AKS), and GitOps delivery with FluxCD, ArgoCD, and Helm. Experienced supporting production platforms for global telecom and enterprise clients, with a track record of improving system reliability through proactive monitoring and autoscaling (Prometheus, Grafana, KEDA), and reducing manual overhead through automation.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, ECR, IAM, EFS, VPC, S3, RDS), Microsoft Azure (AKS, Azure Files, Application Insights), Google Cloud Platform (GCP)

Container Orchestration: Kubernetes, Docker, Containerd

GitOps / CI-CD: FluxCD, ArgoCD, GitLab CI/CD, Helm, Git, GitHub, GitLab

Infrastructure as Code: Terraform, CloudFormation Templates (CFT)

Messaging & Streaming: Apache Kafka (v3.7.0, v4.0)

Monitoring & Observability: Prometheus, Grafana, Kibana, Loki, Alertmanager, Fluentd, Filebeat, AWS CloudWatch, Azure Monitor, GCP Cloud Monitoring

Databases / DBA: MongoDB, PostgreSQL, ClickHouse, MySQL

Security & Artifact Management: Trivy, Harbor, Docker Hub, IAM policy design

Operating Systems: Ubuntu / Linux

PROFESSIONAL EXPERIENCE

DevOps Engineer

Jul 2024 – Present

- Managed and deployed cloud infrastructure using Terraform and AWS services, reducing manual provisioning time through reusable IaC modules.
- Designed IAM roles and least-privilege policies for secure access to S3, ECR, and Secrets Manager across AWS accounts.
- Deployed and maintained multiple Kubernetes (EKS) clusters.
- Implemented GitOps with FluxCD for automated, auditable deployments, cutting deployment turnaround time through automated releases.
- Built and maintained CI/CD pipelines using GitLab CI, improving release frequency and reducing manual deployment steps.
- Monitored production systems with Prometheus, Grafana, and Alertmanager (including Microsoft Teams webhook integration & power automate), improving incident detection time and uptime visibility across namespaces.
- Automated database backup and upgrade processes for MongoDB, PostgreSQL, ClickHouse, and MySQL, reducing manual DBA effort each month.
- Performed Kubernetes capacity planning across worker nodes, identifying memory overcommitment risks and recommending resource limits to prevent outages.
- Analyzed multi-subscription Azure cloud costs (UAT/PROD), flagging budget overruns and identifying Cosmos DB as a primary cost driver, informing optimization decisions.
- Collaborated with globally distributed teams to deliver projects for MTN (South Africa), Mascom (Botswana), and Yujaa on time and within budget.
- Worked closely with developers and QA on new platform features, deploying changes to Dev and Staging environments for testing before promoting validated builds to Production.
- Automated ECR image updates for Dev and Staging deployments using FluxCD, so new images pushed to ECR were automatically deployed as requested by developers; configured ECR image retention policies to reduce storage costs.

Client Project: Mascom (Botswana) — On-Premises Deployment — DevOps Engineer 2026 – Present

- Led a standalone on-premises deployment of the BDB platform for Mascom, separate from the cloud-based MTN environment.
- Installed and configured the full platform on-premises using Helm charts, managing release versions and rollbacks in a self-hosted Kubernetes environment.

- Deployed and maintained MongoDB on a dedicated bare-metal server to store customer data, configuring it for high availability and performing daily maintenance to ensure data integrity and uptime.
- Coordinated directly with the customer's infrastructure team to plan server, storage, and networking changes required for the deployment.
- Performed resource calculation and capacity sizing (CPU, memory, storage) to right-size the on-premises infrastructure ahead of installation.
- Worked with the customer to resolve on-site infrastructure dependencies and environment-specific configuration issues during rollout.

Client Project: Mobile Telecommunications Corporation, South Africa (MTN) — DevOps Engineer2024 – Present

- Maintained Kubernetes deployments using FluxCD for continuous delivery, ensuring consistent, auditable production releases.
- Deployed the BDB platform on Microsoft Azure using AKS and Azure Files for persistent storage, supporting high availability at scale.
- Monitored application performance with Azure Application Insights, identifying and resolving HTTP 404/400/500 errors to reduce downtime.
- Configured Kubernetes Horizontal Pod Autoscaler (HPA) for CPU/memory-based autoscaling, improving resource efficiency through autoscaling.
- Researched and implemented KEDA-based autoscaling to handle high-traffic periods, analyzing traffic patterns to identify peak load windows; used Prometheus metrics on incoming HTTP request volume as the scaling trigger for KEDA.
- Performed daily health checks and validated dashboard data across critical project components, providing 8/5 production support.
- Monitored database backups to confirm completion and data integrity, ensuring zero data-loss incidents.

Trainee – DevOps **Apr 2024 – Jul 2024**

- Gained hands-on experience with Docker, Kubernetes, Jenkins, Git, GitHub, GitLab, FluxCD, Helm, Prometheus, Grafana, AWS, and Linux.
- Deployed the BDB platform on AWS using EKS and EFS for persistent storage, ensuring high availability and scalability.

Python Development Intern **Nov 2023 – Mar 2024**

- Completed hands-on training in HTML, CSS, JavaScript, Python, Django, and MySQL.
- Built a Watch Online streaming website using HTML, CSS, and JavaScript.
- Built a Hospital Booking System using HTML, CSS, JavaScript, Python, Django, and MySQL.

EDUCATION

Bachelor of Computer Applications (BCA)	Jul 2026 – 2029 (In Progress)
IGNOU — Study Centre 1300, Bangalore Regional Centre	
Diploma in Electronics & Communication Engineering (ECE)	2020 – 2022
Government Polytechnic College, Palakkad, Kerala
